

It Made them Mean. It Made them Cranky. They were...

BICARB TORTURED NURSES

The Most Horrible Jug Fetching Adventure Since Gunga Din—

Forced to lug huge solution containers through hospital corridors—Their hospitals were turned into a Jug-Hauling Hell!

Lana Tooner, RN

As the Nurse who finally brought the problem to the hospital administrations' attention by spending two weeks in traction in her own hospital after hauling those huge bottles of solution!

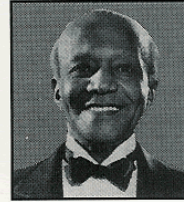

Bernie Szabo, C.H.T.

As the handsome medical technician who fought the battle of the big solution bottle and won. But not without the help of the woman he loved—and by complaining a lot about things like mixing, filling, labeling and spilling.

Sylvia Waterburgh

As the brilliant Hospital Administrator who recognized the need to install a direct feed concentrate system which she confidently selected from the Great Water Medical Solutions Division.

Rex Carrs, MD

As the doctor who was smart enough to know that Great Water has developed the perfect solutions distribution system for acidified, bicarb and purified water in hospital-based and free standing clinics!

**It's Proven
& Dependable!**

**It's
Revolutionary!**

**It's
Exciting!**

**It's Safer
& More Sanitary!**

Put an end to antiquated solutions distribution methods in your facility. Call Medical Solutions International and talk to the technical director. It will surprise you how simply and inexpensively you can end the tortures of mixing, lugging, filling, and mislabeling forever.
